

The
ENVIRONMENTAL
BULLETIN *from the Savannah River Site*

August 4, 1997 • Volume 8 • Number 17

***Revisions to SRS permit on the
Consolidated Incineration Facility***

The U.S. Department of Energy (DOE)-Savannah River Operations Office has requested from the South Carolina Department of Health and Environmental Control (DHEC) a modification to Savannah River Site's (SRS) 1988 Resource Conservation and Recovery Act (RCRA) Part B Permit Renewal Application, Volume X.

This volume details operations of the site's Consolidated Incineration Facility (CIF).

The revision (Rev. 14) includes the addition of a pressure filter to the offgas system to reduce the amount of blowdown generated and several other minor changes to the volume.

CIF is designed to treat and reduce the volume of certain incinerable wastes. The facility began radioactive waste op-

eration on April 24, 1997.

More information, including the actual permit application, is available for review and copying at the DOE Public Reading Room located at the University of South Carolina-Aiken library, or by contacting personnel listed below.
